## WHY NETSUITE

### Designed for a Modern Company

Cloud-based, mobile-enabled and social, NetSuite frees the modern business from antiquated PC-based, anti-social systems locked behind the firewall. At its core, NetSuite provides a dynamic, easy-to-use platform designed for all users across your global organisation that can be accessed via any device, at any time.

### Flexibility Built-In

As your business changes, you can change your business system. Scale up, spin off, adopt new business models, NetSuite's flexibility lets you do it all, quickly and easily. Version-lock is a thing of the past. With every NetSuite upgrade, your configurations and customisation migrate seamlessly. NetSuite's SuiteCloud platform supports complete application customisation and an average end user can configure and customise NetSuite to their specific business needs.

### Business Intelligence for All

Real-time analytics is the NetSuite user interface. Users know what they should be doing and how they're helping the business, with easily accessible reports and key performance indicators. Vital business data is analysed and displayed from right within the system. NetSuite Business Intelligence provides the power of built-in, real-time dashboards, reporting and analysis across all the integrated processes within the software suite.

### Commerce-Ready ERP

Regardless of your industry, changes in commerce are affecting you, whether you are planning for it or not. The good news is, with NetSuite, your core business system now becomes your customer-facing commerce system with a customisable, customer-specific, pixel perfect experience. Featuring an advanced webstore that allows the creation of uniquely branded and personalised shopping experiences optimised for multiple devices, SuiteCommerce empowers businesses to run across any touchpoint—web, brick-and-mortar stores, social and mobile.

### Cloud ERP That Reaches Across the Business

Maximising the ROI on ERP means extending beyond automating back-office operations to streamlining sales and service processes. NetSuite automates all elements of the business from core ERP to customer relationship management (CRM), professional services automation (PSA), Human Capital Management (HCM) and ecommerce. The result is streamlined order management and procurement processes, cross functional reporting and elimination of business silos.

## KEY NETSUITE FEATURES

NetSuite provides cloud financial, CRM, ecommerce, HCM and professional services automation management for all organisations from fast-growing midsize companies to large global organisations. Additionally, each component of NetSuite is modular, enabling it to be deployed and integrated with existing investments as required. NetSuite OneWorld scales with global businesses by providing complete multi-subsidiary management and support for local accounting regulations.

- Maintain all currency exchange rates, and perform sophisticated roll-up across subsidiaries.
- Get real-time visibility, ensuring consistent and compliant internal and external reporting both globally and locally.

## Manufacturing

NetSuite is a complete solution for manufacturing organisations that require inventory management with dynamic replenishment, production planning, warehouse management, financial accounting and costing, customer and partner relationship management, and ecommerce. Whether you're a true manufacturer, an assemble-to-order business or a distributor with manufacturing requirements, NetSuite lets you manage your entire business with one integrated cloud-based suite, delivered on demand over the Internet. It provides the essential visibility and control of key processes that manufacturers need to effectively compete in the market.

## Services Resources Planning (SRP)

NetSuite offers the only cloud solution for project- and product-based companies with project management, resource management, project accounting and timesheet and expense management. It delivers advanced functionality across sales, service and finance that drives down bench time, elevates on-time project delivery, improves invoicing accuracy, streamlines revenue recognition and increases visibility into the services organisation.

## Multi-Channel Commerce

NetSuite SuiteCommerce enables retailers, manufacturers and distributors to seamlessly connect every step of a multichannel, multi-location business—from ecommerce, POS and order management to merchandising, marketing, inventory, financials and customer support. Featuring an advanced webstore that allows the creation of uniquely branded and personalised shopping experiences optimised for multiple devices, SuiteCommerce empowers businesses to run across multiple touchpoints—web, brick-and-mortar stores, social, mobile—all from a single, unified cloud-based commerce platform that provides unprecedented visibility into your business and customers.

### Customer Relationship Management (CRM)

NetSuite allows enterprises to automate the opportunity-to-cash process and manage CRM activities across divisions and subsidiaries. It provides global visibility into and management of every aspect of CRM, including marketing campaigns, sales opportunities, forecasts, customer service, partner management and more.

### TribeHR Human Capital Management (HCM)

NetSuite TribeHR combines the rich, traditional HCM capabilities needed to manage growing organisations with an engaging, social interface that encourages employee involvement and collaboration. NetSuite TribeHR's system of record for employee activity, together with NetSuite's single system of record for core operational business data, gives organisations a modern platform to run the core aspects of their business—all with the scalability, flexibility and agility of the cloud.

### SuiteCloud Platform

NetSuite's proven, secure, reliable and scalable SuiteCloud platform delivers the customisation and extensibility you need to make NetSuite your business management platform of choice for your current and future needs. And with SuiteApp.com, you gain access to an online marketplace of value-added integrated cloud solutions to power specific business processes or meet industry-specific needs.

SuiteCloud is a comprehensive offering of cloud development tools, applications and infrastructure that enables customers and software developers to maximise the benefits of cloud computing. ## NESUITE FOR LARGE ENTERPRISES

Just because you have pre-existing investments in a corporate on-premise ERP platform, doesn't mean you can't adopt cloud platforms. In fact, your prior investments in no way preclude you from taking advantage of all the benefits NetSuite cloud ERP offers.

Enterprises can deploy NetSuite to every corner of the globe with confidence. With support for more than 190 currencies, 19 languages and country-specific accounting standards across Australia and New Zealand, Asia, Europe and America, NetSuite enables organisations to seamlessly meet the individual needs of local operations.

Numerous enterprises such as Knowledge Universe, Shaw Carpets, Williams-Sonoma, CA Technologies, Jollibee, Qualcomm, Olympus and others have deployed NetSuite across divisions and subsidiaries versus enduring expensive global on-premise deployments. SuiteCloud Connect provides packaged integration with prebuilt support for Oracle and SAP, together with connectors with enterprise integration tools such as Informatica, Dell Boomi and IBM Cast Iron that ensure NetSuite can seamlessly exchange transactions and master data with existing corporate investments.

In fact, given that businesses are constantly changing there are always events that present opportunities for you to take advantage of a cloud ERP solution like NetSuite.
